Professional Summary

Computer Science and Data Science graduate with hands-on experience in Python, SQL, Power BI, Excel, ETL pipeline development, Data Analysis, Machine Learning, and Dashboard Development. Proficient in data cleaning, data transformation, exploratory data analysis (EDA), KPI reporting, data visualization, business intelligence, and database management. Experienced in developing analytical solutions, automating reporting workflows, and transforming complex datasets into actionable business insights. Skilled in Pandas, NumPy, SQL querying, Power BI dashboards, and statistical analysis. Seeking opportunities as a Data Analyst, Python Developer,

Education

Raghu Engineering College

Nov 2022 – Apr 2026

B.Tech. Computer Science and Data Science — CGPA: 8.0

Visakhapatnam

Experience

Fluentgrid Ltd

Aug 2025 – Nov 2025

Software Intern

Visakhapatnam

- Developed a Python-based VRV air consumption monitoring system for HVAC energy optimization.
- Built ETL pipelines using Python, Pandas, and NumPy for data cleaning, transformation, and validation of operational datasets.
- Created interactive Power BI dashboards to visualize energy consumption trends, KPIs, and equipment performance metrics.
- Automated reporting workflows using Python and Jupyter Notebook, reducing manual effort and improving reporting efficiency.
- Optimized SQL queries for efficient data extraction and analysis.
- Performed data quality validation checks to improve reporting accuracy and consistency.
- Collaborated with business stakeholders to translate requirements into analytical solutions and reports.

Projects

Energy Consumption Analytics Dashboard | Python, Pandas, SQL, Power BI

2025

- Analyzed HVAC operational data collected from multiple indoor and outdoor units to identify energy consumption patterns and operational inefficiencies.
- Performed data cleaning, preprocessing, transformation, and validation using Python, Pandas, and NumPy to improve data quality and consistency.
- Conducted Exploratory Data Analysis (EDA) to identify trends, anomalies, and key performance indicators (KPIs) affecting energy utilization.
- Designed and developed interactive Power BI dashboards to monitor energy consumption, equipment performance, and operational efficiency metrics.
- Implemented KPI tracking and performance monitoring dashboards to support data-driven business decisions.

Enhanced Todo Management System | Python, Django, SQLite, HTML, CSS

2026

- Developed a full-stack task management application using Django, SQLite, HTML, and CSS with secure user authentication and authorization.
- Implemented CRUD functionalities for task creation, updating, tracking, categorization, and deletion.
- Developed task history tracking with restore and permanent delete functionality to maintain data integrity.
- Optimized database operations using efficient SQLite queries and indexing techniques.
- Conducted testing and debugging to ensure application stability, functionality, and responsiveness across different use cases.

E-Commerce Management System | Python, Django, MySQL

2025

- Developed a full-stack e-commerce platform using Django and MySQL with secure user authentication and account management features.
- Implemented product catalog management, shopping cart functionality, order processing, and customer management modules.
- Optimized SQL queries and database interactions to improve application performance and reduce response times.
- Developed inventory management features for real-time product stock monitoring and updates.
- Implemented order tracking, sales monitoring, and transaction management functionalities.
- Built responsive user interfaces using HTML and CSS to provide an intuitive user experience across devices.
- Created administrative modules for managing products, customers, inventory, and order workflows efficiently.

Technical Skills

Programming Languages: Python, SQL, C, HTML, CSS

Frameworks & Libraries: Django, Flask, Pandas, NumPy, Matplotlib

Data Analytics: Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Statistical Analysis, KPI Reporting.

Business Intelligence: Power BI, Tableau, DAX, Power Query, MS Excel

Databases: MySQL, SQLite, Relational Database Management, Query Optimization

Tools: GitHub, Jupyter Notebook, VS Code
